

IF YOU CAN DREAM IT, YOU CAN DO IT

Established in 1997, Prince Academy, with a life of its own a CBSE affiliated English medium Eastern Rajasthan, vicinity of Sikar. With a vision of quality education and the overall advancement of your ward. Today the academy is throbbing and creating a visible difference in the entire Eastern Rajasthan, gradually extending its reach throughout the country and abroad. So let's have some glimpses of our successful journey.

The beginning of the day decides how it will turn out, so we begin our days with the remembrance of the almighty.

WHY PRINCE ?

In today's competitive world, where it is a burning question for students, what carrier option should they choose? Our institution provides them with motivational and carrier - oriented guidance sessions & has introduced several competitive batches and academic classes. Keeping pace with the demands of the current

We provide them with UPSE foundation classes besides the result - oriented academic courses.

To keep the children ready for the CUET exams, which have become a

compulsion, to get enrolled in all renowned universities, this year onward, we have started a CUET particular batch.

We are also trying to shape the future judiciary system of India by preparing our students for CLAT exams and getting them enrolled on the most prestigious NLU's.

We also prepare our students from the commerce stream for the C.A. entrance exams and their academic studies.

Apart from these courses, we have also begun with new batches to prepare for STSE and NTSE exams. So that majority of our children get the benefit of govt. scholarship programmes

Role of Education in Nation Building and Contribution of Prince in this Campaign

The first Noble Prize winner of India, Rabindranath Tagore says about education, "The highest education is that which does not merely give us information, but makes our life in harmony with all existence."

In my opinion education is the process of imbibing external progressive

ideas, thoughts, and beliefs into our internal thinking which eventually gets reflected in our actions. Role of education is immense towards a moral, ethical and just society.

In a country like India, only education can help in multiple ways to make it a developed nation. And thus the role of every

single institution which is providing education in any format or category becomes very significant and to support this statement.

Our institution, Prince Edu. Hub, has taken this initiative as an opportunity, as it offers a number of life enrichment & community oriented courses besides the academic and

general curriculum.

The scenario of education has completely revolutionized with the help of multi-dimensional programs offered by Prince in various sectors like academics, sports, medical, engineering, armed forces, civil services, legal department, college education, including

field of agriculture, commerce and many more.

Prince Edu. Hub. Is committed to serve the nation, by providing best educational environment along with world class infrastructure, including advanced, modified technic and modern educational support system, operated by highly qualified, well

experienced and modern educators.

Thus we can assure the nation as well as the world that as an educational society, we are not going to leave any stone unturned until and unless every individual becomes literate and contribute his/her part to make the nation a developed one.

Education is the best friend.

An educated person is respected everywhere.

Education beats the beauty and the youth.

SPORTS

We Focus on All Round Development of Students

Best Performance in both Academics & Sports

Sports play a vital role in the physical development of a person. So, to fasten the flow of adrenaline a bit, we provide a wide range of sports activities in our premises, including not just players but also cricket, hockey, football, basketball, handball, volleyball, wrestling, boxing, archery, shooting etc. Our young ones are achievers. Their performance in various tournaments and selections at national and state levels is the live testimony of this.

Sports teachers you character, it teaches you to play by the rules, it teaches you to know what it feels like to win and lose-it teaches you about life.

Prince Academy has been striving to shape a better future of the nation since last more than two decades. Since the establishment of the institution we have always been amongst the finest educational institutes, but we were never satisfied with that so we kept working for the betterment of ourselves as well as the society. And this year again breaking our own records, we took the pride of grooving some new gems in our own merit factory.

This year the academy has set new benchmarks not only in

CBSE results 2022, where 24 Students Scored above 98%, 148 Students Scored above 95% & 487 Students Secured above 90%. Apart from that 3 of our students secured all India Rank 2nd with above 99.80%.

But also in CUET entrance exams where 12 students scored 100% and STSE scholarship exams in which there were 46 selections from our institute in the top 20 Ranks. This shows the strong determination and team efforts of our students and the entire staff.

Substance Misuse

From the beginning of the life, human activities are in progression to utilize available resources to its optimum limits. In the name of various discoveries the substance, the material is being misused by human. Human has found itself unable to manage the sustainable use of substances. The earth is full of matter at required strength to sustain lives in varieties. We need to prevent the substance in its pristine form for long lasting presence of life on earth.

Since when man has started to develop new articles for the betterment of life, its ease, without knowing the ultimate consequences of the devices, since then the problems are becoming more hazardous to keep substance available for the requirements. For an example: when we are making ornaments to look, to present ourselves beautiful, we are mining more and more gold from the earth crust without knowing the fact that we are obstructing normal cycle of gold, which may require for the existence of many other organisms. All the life on the earth is made up of combination of various atoms and if any of the substance is short in the soil, it will not be available for the continuity of some life forms. For the sake of our beauty and comfort we are creating shortage of many such materials in the earth's crust. Gold, Silver, Iron, Copper, Sulphur, Sodium, Carbon and such many metallic and non-metallic atoms are not in the nature's proper cycle. We have taken it out from the earth's crust and kept it out of the circulation. These materials are required for the formation and maintenance of diversity of life. Therefore now a days we are facing many life sustaining problems. New diseases are approaching to ruin us. We have developed new weapons to destroy the beautiful life forms. This is sure that by doing all these activities we are running with a pace towards the end of life on earth. Human thinks he is the most intelligent creature of universe but extra intelligence has become the mother of many life threatening activities.

So, It's a humble request to stop doing such things, otherwise human will be in deep and serious trouble and would not be able to survive longer on earth. Already many diverse species have become extinct and many more are under red alert. Be careful prevent the originality of the nature, don't play with nature otherwise only nature will win the game by getting your game over.

ASIA EDUCATION SUMMIT & AWARDS 2022

ABYSS TO BLISS

“You will be a failure”, “you don’t even have guts to speak”, “Are you autistic?” This is what everybody used to tell me. I felt so miserable whilst being with my own kin.

Finally a moment came in my deteriorating liter when I felt like my whole world was falling apart,

but I had to give life a chance, so I decided to move to hostel to dodge the negativity, and that’s how I enrolled myself to ‘Prince Academy’ which eventually proved to be the best thing that ever happened to me.

Initially the acceptance of change was challenging, but as it is said that ‘a lamp shines brightest in the dark’, out of all the negative feelings that I had, my strength unveiled and bestowed me with academic achievements. Along with that it dawned to my

conviction that how good I am in art and literature.

Being vocal at morning assemblies & participating in competitions have channeled confidence in me from some unknown corner of cosmos. Talking to teachers here, with finest intellect has always made me ecstatic. I can just say that this school has facilitated my long lost beads to fabricate me into a marvelous carcanet.

Freedom of expression is the foundation of human rights, the source of humanity, and the mother of truth.

MY JOURNEY IN PRINCE

My school life in ‘Prince Academy’ is filled with lots of exhilaration and learning. It made me understand the worth of time and become a sublime chapter on my entity.

It is the period, where I found myself

learning not only the academic lessons but also the moral and ethical values; that improved and enlightened my personality.

It has been a while since I have been a student of Prince Academy and my journey till now from the very first day of the session is full of enthusiasm and dedication.

Prince Academy has always helped me to learn the adherence to

my studies and duties. Not only this, but my school has also helped the students to develop the great lesson of various hobbies and self actualization. The teachers over here in my school are really outstanding and motivating, who gives us every kind of knowledge possible and also encourage us to accomplish the tremendous heights in our life. Along with this, Prince Academy is the best platform for those who are interested in curricular activities.

- by **Tina Singh**
(XII Humanities)

MY EXPERIENCE IN PRINCE ACADEMY

“The entire purpose of education is not restricted towards an excellence in bookish knowledge only, but to inculcate human values, wisdom, trust,

compassion and self confidence.”

It has been more than a year since I got admission in ‘Prince Academy’. The session started with great devotion, dedication and determination, and it’s still going on with the same pace, making me better every passing day.

Prince Academy is

the best place for a student to realize his/her potential not only in academics but also in life skills, required to face the future challenges. We are learning these skills with the guidance of our mentors and the opportunities provided by our school.

My parents also express their gratitude

by saying that they are confidently assured about my overall development and a bright future because of the healthy atmosphere and excellent learning opportunities at my school.

I feel blessed to be a tiny part of this huge empire.

- A shrimp’s heart is in its head.
- Crows can recognize and remember human faces.
- There are bodies of over 150 hikers on Mount Everest and they are used as landmarks.

Director's Desk

I feel immense pleasure and am proud to invite you to have a glimpse into the heart that beats behind the appealing stage of our exceptional institution, which has recorded perpetual & sound academic achievements with extensive co-curricular programmes as well.

Prince Education Hub commenced its journey in 1997 with a mission to provide wholesome & quality education to our future nation builders. The group at the start as Prince School has made a tremendous contribution and has crossed many milestones. Today, the role of a school is not only to achieve excellence in education but also to teach the love of knowledge in the students and to inspire them to become lifelong learners, critical thinkers and productive members of an ever changing global society.

We are constantly improving our teaching methodology to turn learning into a combination of classroom study, research & scientific discovery. The alimonies of the school, well settled across the globe, are clear examples of cherishable and vivid learning experiences at our school.

I assure you that you will have a meaningful interaction with the school staff through a good out reaching experien -ce. Your valuable suggestions are always welcome. Your collective efforts and support will help us produce the best talents not only in India but throughout the world. This is the only way I can repay society what I owe.

Shaping the future

"Education is the passport to the future, for tomorrow belongs to those who prepare for it today". These famous lines by Malcolm X are the foundation of our institute, where we are shaping the living beings to turn them into an ideal human and responsible citizen. We work in a unique and multi dimensional model, including physical, mental, academic, cultural, moral and ethical perspective of a Human being. The entire purpose of education is not to be restricted towards a world excellence in bookish knowledge only, but to inculcate human values, wisdom, trust, compassion and self confidence among students. It is believed y o u

to be an engine of children to realize their potential in the future. Hence the education sector has experienced the rapid expansion of skills required for meeting any future challenges. We make use of the successful and responsible new citizens who are culturally and ethically enriched and knows the importance of values and principles...

Career Guidance

"The law challenges arbitrariness with a culture for respect of rights. The law in that sense is a vital element in our society because our society can survive and be stable so long as the law encourages inclusion and plurality. When we respect the fact that each of us has differing views and we respect those views."

In this highly competitive world, where new career options promising lucrative lifestyle and professional dignity mark a student's future, the choice to opt for the right career is often challenging. This article is aimed to provide an understanding as to why appearing in the CLAT exam, is a primary step to pave one's career path.

Scope of CLAT in Future :- Tracking the trajectory of the scope of the CLAT test, right from its inception, to the present and extrapolating it to the future (let's say the next 10-15 years), it is evident that the popularity of the test is on a boom. As the opportunities of building a career in corporate law gain momentum in India, the national law schools provide a stable platform to take off to such a career oath. Since the law as a profession, especially corporate law is becoming increasingly popular the career possibility that CLAT extends to the future is also going to accelerate. In fact, the current Indian legal scenario is such that it's the perfect time to consider cracking the CLAT test to get into one of the top law schools thus cementing a stable future laced with the promise of an attractive salary.

MOTIVATION IS THE KEY TO SUCCESS

A motivated person can do almost anything. As it is mentioned in the Ramayana, that the most powerful Lord Hanuman too was unaware of his strength and capability. It was only after being motivated by Jambvant Ji that he could explore his inner capability. So to make our young ones aware of their hidden talents we keep arranging motivational sessions by the most prestigious and celebrated people, like IAS officers, Sports Person, RJS, DM, ADM, etc.
